Software Developer with ~3 years of experience owning and building **scalable, high-performance UI systems** and backend services for **cloud platforms**. Possesses hands-on experience in React TS/JS and Java with a growing focus on performance, usability, user-centric system design and AI-driven architecture.

WORK EXPERIENCE

Oracle India Pvt Ltd.

Software Developer IC2 - UX Engineering

Bangalore, IN
Aug 2023 - Present

- Owned frontend architecture and design-system of a shared React + TypeScript **component library** adopted by **150+ plugin teams** across oracle.com and OCI, cutting duplicate UI code by ~30% and shortening new-plugin delivery cycles
- Developed UI **components** with Storybook and **template** builders using React and TypeScript for OCI Console (MAUI) which are being used across 150+ teams at OCI for a consistent interface experience throughout
- Enabled scalable UI development through **config-driven templates** to standardise interfaces across enterprise plugin ecosystems
- Supported migration and onboarding of 90+ plugin teams onto Redwood for reducing integration friction and improving **UI consistency**
- Contributed to building an **internal AI-powered chatbot assistant** using OpenAI and Gemini APIs which leverages a structured knowledge base using manual-RAG architecture for plugin teams to self-serve first-line configuration queries and reducing reliance on on-call developer's support by ~30%
- Explored **performance optimization** of large data for 40+ chart metrics using virtualization, thereby improving rendering performance and responsiveness

Member of Technical Staff at OCI - OCS Billing Service

- Developed **REST APIs** for cost computation for generating invoice payload generation for OCI Alloy environments
- Successfully migrated 40+ service instances in all realms to an updated Oracle Linux version, improving infrastructure reliability
- Automated** scheduled **analytics pipelines** for ingestion of incoming usage data into analytics buckets using Oracle Data Integration and cron-triggered Data Flow tasks to reduce manual updates and improve operational workflows
- Practised Test-driven development through JUnits and Integration testing frameworks, ensuring test coverage and facilitating reliability of the application

GAP Inc.

Software Engineering Intern

Remote
June - July 2022

- Created dashboards in Splunk for monitoring and analysis using **Splunk Queries** for monitoring across 4 major retail brands of GAP to support data-driven business and apparel market decisions

SKILLS

- Frontend:** JavaScript (ES6+), HTML5, CSS3, TypeScript, React, Preact
- Backend:** Python, Java, C, SQL, REST APIs
- Tools and Frameworks:** Git/Github, Linux, Terraform, OCI, DevOps, CI/CD, Postman, Agile, Scrum, Version Control
- Testing:** Jest, React Testing Lib, Playwright, Unit testing, End-to-End testing, Lost Pixel
- UI / UX:** Figma, UX design principles
- Relevant courses:** DSA, Database systems, OOP Design Patterns, Cloud Computing, HCI, Machine Learning

PROJECTS

DTM - A Design Thinking Machine AI-agent (*ongoing*)

- A **prompt-engineered AI system** using ReactJS and FastAPI to guide structured design thinking through relevant crisp questioning and conversational workflows using Puter.js for open-source API keys used for OpenAPI integration
- Exploring RAG architecture, vector embeddings, adaptive AI UI states, and multi-agent orchestration concepts

JSON-Renderer: A Config-Driven UI System - ReactJS ([working model](#))

- Built a config-driven UI system to render multiple templates (dashboard, table, stepper, conditional forms) from JSON input config

Fire Disaster Preparedness in Virtual Reality - Unity, C#, Blender ([implementation video](#))

- Developed an application tutorial and a case study in Oculus Meta Quest 2 VR headset to inculcate **incident responsive behaviour** and preparedness in daily life and reduce risks of fire disaster awareness

EDUCATION

MKSSS's Cummins College of Engineering for Women, Pune (B.Tech IT - CGPA 8.3)

May 2023

LEADERSHIP ROLES / ADDITIONAL INFO

- Represented India at NASA**, USSRC, Huntsville AL, USA through Honeywell Leadership Challenge Academy
 - Real world challenges - Incident Response, Rocket simulation, Aviation simulation, team building challenges
- Responsibly **managed** cultural fest with a footfall of **3500+** as a **Student Panel** member
- Experience-driven thinker, interested in designing intuitive and impactful human interactions: [UX Design passion projects](#)
