Software Developer with ~2.5 years of experience spanning **scalable UI systems** and backend services for **cloud platforms**, bringing a holistic understanding of how data flows from APIs to user interfaces. Skilled in React and TypeScript, with a strong focus on usability, performance, and intuitive design systems.

WORK EXPERIENCE

Oracle India Pvt Ltd.

Software Developer - UX Engineering

Bangalore, IN

Aug 2023 - Present

- Developed UI **components** and **template** builders using React and TypeScript for OCI Console (MAUI)
- Enabled scalable UI development through **configuration-driven templates** contributing to scalable and consistent interface generation
- Supported migration and onboarding of 90+ plugin teams onto Redwood, reducing integration friction and improving **UI consistency**
- Contributed to building an **internal AI-powered assistant** for MAUI which leverages a structured knowledge base (Confluence-derived documentation), enabling plugin teams to self-serve configuration queries and reducing reliance on on-call support
- Explored **performance optimization** of large data for 40+ chart metrics using virtualization, improving rendering performance and responsiveness

Member of Technical Staff at OCI - OCS Billing Service

- Developed **REST APIs** for cost computation for generating invoice payloads for OCI Alloys
- Successfully migrated 40+ service instances in all realms to an updated version of Oracle Linux running on the servers
- Built an automation pipeline for triggering dataflow tasks and cron jobs for analytics with Data Integration
- Practised Test Driven development through JUnits and Integration testing frameworks, ensuring test coverage and facilitating reliability of the application

GAP Inc.

Software Engineering Intern

Remote

June - July 2022

- Created dashboards in Splunk for monitoring and analysis using **Splunk Queries** for the 4 major brands of GAP which contributes to making relevant business decisions in terms of apparel market

SKILLS

- **Frontend:** JavaScript, HTML, CSS, TypeScript, Jest
- **Backend:** Java, Python, SQL
- **Tools / Frameworks:** ReactJS, Git, Terraform, OCI
- **UX:** Figma, UX principles

PROJECTS

Disaster Preparedness in Virtual Reality ([Live demo](#))

- App Development in Oculus Meta Quest 2 VR headset for fire disaster awareness and preparedness
- Serious game with social cause to inculcate **incident responsive behaviour** in daily life and reduce risks
- Tech stack: Unity, C#, Blender

LEADERSHIP ROLES

- **Represented India** at NASA, USSRC, Huntsville AL, USA through Honeywell Leadership Challenge Academy
 - Global Students from 30+ countries
 - Real world challenges - Incident Response, Rocket simulation, Aviation simulation, team building challenges
- Responsibly **managed** cultural fest with a footfall of **3500+** as a **Student Panel** member
- Co-founder of college XR club - Avatri

EDUCATION

MKSSS's Cummins College of Engineering for Women, Pune

B.Tech IT (CGPA 8.3)

May 2023
